Safe Return

Say hello to Safe Return℠, a fixed-indexed annuity from Great American Life Insurance Company® featuring:

★ **A return of premium guarantee**
★ The opportunity to select from indexed strategies with a bailout feature and a declared rate strategy
★ Indexed strategies that earn interest tied to gains in the S&P 500
★ Income you cannot outlive
★ 10% penalty-free withdrawals
★ Liquidity with an extended care waiver and terminal illness waiver
★ 10-year declining early withdrawal charges
★ A guaranteed minimum surrender value

A great American icon: Old Faithful Geyser in Yellowstone National Park
Safe Return offers protection

Safe Return offers two forms of protection: a **return of premium guarantee** to ensure your money is protected and a **bailout feature** to help protect your opportunity for growth.

**Return of premium guarantee**
You can have the extra certainty you may be seeking, knowing that if the unexpected occurs, you can surrender your annuity and receive your purchase payments, less the sum of prior withdrawals.

**Bailout feature**
Safe Return features a bailout on available indexed strategies that protects your opportunity for growth. This feature allows you to withdraw your money from a particular strategy **without penalty** if the cap for that indexed strategy ever falls below its bailout cap. The bailout cap will always be below the initial cap. If the bailout cap is triggered, we will send a letter and give you 30 days to withdraw the money from that strategy with no penalty. If no action is taken, the money will remain in the strategy.

About fixed-indexed annuities

A fixed-indexed annuity is a deferred annuity with multiple interest crediting strategies. This type of annuity allows you to allocate your money among strategies that credit interest in various ways.

**Is a fixed-indexed annuity right for me?**
Fixed-indexed annuities may be right for you if you want the potential to earn rates higher than those traditionally available from fixed annuities and you like the idea of receiving interest at a rate determined, in part, by the performance of an index. Regardless of market conditions, your fixed-indexed annuity’s value will not fall below your total purchase payments, unless you take withdrawals from or surrender your contract during the early withdrawal period, or if you annuitize your contract for less than the minimum account value payout period. This means that your principal can remain protected.

Estate and probate advantages

A fixed-indexed annuity like Safe Return offers a death benefit that distributes the remaining contract value to beneficiaries without going through probate. If death occurs before you begin receiving annuity income payments, your beneficiary is guaranteed to receive the account value (less adjustments for outstanding loans or other applicable charges).

Interest crediting choices

Choose your interest crediting strategies for each term and adjust them as your financial situation changes. Our products currently offer a **declared rate strategy** and **indexed strategies**.

**Declared rate strategy**
Funds in the declared rate strategy earn compound interest credited daily based on a rate set at the start of the term by the company. This rate can vary for subsequent terms; however, this declared interest rate will never be lower than the guaranteed minimum declared interest rate stated in your contract.

**Indexed strategies**
Funds in an indexed strategy earn interest based on an indexed interest rate. Interest is credited to the amount assigned to an indexed strategy on the last day of the term, using a formula determined by which indexed strategy(ies) you choose. The following strategies may be available on your Safe Return contract:

**Annual point-to-point**: An annual point-to-point strategy measures the change of the index by comparing the closing S&P 500® value at the end of the term to the closing S&P 500 value on the first day of that term. Annual point-to-point may be particularly beneficial when the index is rising, but may reduce the amount of interest you would receive if the S&P 500 declines just before the end of a term.

**Monthly averaging with cap**: A monthly averaging strategy measures index change by comparing the average of the monthly closing S&P 500 values during the term to the closing S&P 500 value on the first day of that term. Averaging the monthly values over the term could protect you against severe declines in the S&P 500. Alternatively, averaging may reduce the amount of interest you would earn when the index is rising.
When you're ready to annuitize, you can have the safety of knowing that your retirement income will never run dry. Settlement options are available to provide a steady stream of income on which you can depend. You can choose the length of time to receive payments, or elect to receive an income stream that you cannot outlive.

While an annuity should provide retirement income, an emergency or unforeseen circumstance may require you to access your money earlier than planned. Great American Life® offers a number of options to withdraw the money in your annuity. Note that withdrawals prior to age 59½ may be subject to IRS restrictions and a 10% federal penalty tax. Withdrawals will reduce the account value and related benefits. Also, indexed interest will not be credited at the end of a term to withdrawals made during a term from an indexed strategy.

**Early withdrawal charges**

Please refer to your disclosure document for the Safe Return early withdrawal charge schedule. Charges are applied during the early withdrawal charge period to amounts withdrawn in excess of the 10% penalty-free withdrawal allowance; to amounts annuitized, where payments are made for less than 10 years; and to full surrenders. Please note that this does not affect the return of premium guarantee feature of this product.

**Loan availability**

With Safe Return, you may be able to take out a loan at a reasonable interest rate. Loans are available for certain qualified plans (subject to minimum and maximum loan amounts and repayment requirements). Remember, a loan may adversely affect your account value and outstanding loan balances will be deducted from your account value upon surrender, annuitization or death.

**Guaranteed minimum surrender value**

The guaranteed minimum surrender value is 100% of your purchase payments, less withdrawals and early withdrawal charges, plus interest credited daily at a minimum guaranteed rate, minus an amount equal to the early withdrawal charge rate multiplied by the account value.

**Extended care and terminal illness waivers**

Extended care and terminal illness waivers are available on your contract for no additional charge. Please see the back page of this brochure for additional information.

**IncomeSecure**

The IncomeSecure™ guaranteed income rider offers a 10% income credit and a 7-year income rollup period. When you purchase this rider with your fixed-indexed annuity, the amount on which income payments under the rider are based—the income base—is increased each year by income credits and any additional purchase payments you may make, and decreased by any withdrawals.

In good times, the income base may be reset to equal your account value. In bad times, your income base is guaranteed to increase each year by income credits. As your income base grows, so does your annual income payment. Each year before income payments start, we increase your income percentage by 0.10% until it reaches 7.5% for the lifetime income option and 6.5% for the spousal lifetime income option, so the longer you wait to receive income payments, the larger your payments will be. The IncomeSecure is available for an annual charge of 0.85% of the income base, and charges are refundable at death if the income period hasn't started.

**IncomeSustainer Plus**

The IncomeSustainer® Plus is a guaranteed income and death benefit rider that offers an 8% rollup credit for income and death benefits, and a 12-year income rollup period. In addition to providing income options, the rider provides a guaranteed death benefit to your beneficiaries. The death benefit is available after the fifth contract anniversary, and enhances the death benefit available with your annuity. Lump sum and annuitization payout options are available for the rider death benefit, and your beneficiaries will be able to choose the death benefit payout option most attractive to them at the time of settlement. The IncomeSustainer Plus is available for an annual charge of 1.25% of the income base.

All guarantees based on the claims-paying ability of Great American Life. Note that any applicable rider charges and fees are withdrawals that will reduce the return of premium guarantee. Additionally, premium tax or other taxes not previously deducted and outstanding balances on any loans will reduce the return of premium guarantee.

With IncomeSecure and IncomeSustainer Plus, withdrawals in excess of free withdrawal allowances or RMDs stop income rollup credits and all withdrawals adversely impact the benefits available under the rider. With both riders, resets may increase the rider charge. The maximum income percentage of 7.5% or 6.5% is available at age 90. Please note, this brochure is a general description of the product. Please read your contract for definitions and complete terms and conditions; as this is a summary of the annuity’s features. In rider contract, income credits are referred to as rollup amounts and income base is referred to as benefit base amount. For use with contract form P10746509NW, and rider forms R6025809NW, R6026109NW, R6032810NW and R6036711NW. Contract and rider form numbers may vary by state. Products and features may vary by state, and may not be available in all states.
The advantage of a fixed-indexed annuity is that you can’t lose your money, regardless of index performance, unless, during the early withdrawal charge period, you withdraw money, surrender your contract or annuitize your contract.

This illustration is not a comprehensive example of how a fixed-indexed annuity credits interest. Ask your financial professional for a complete description of how a fixed-indexed annuity and its indexed strategies work.

This graph illustrates historical performance of the S&P 500® across 10 years. The hypothetical fixed-indexed annuity in this example uses the annual point-to-point index method based on changes in the S&P 500 to calculate the indexed interest rate for each term. For purposes of this illustration a 5.0% cap, 0% index spread, 100% participation rate and one-year term is applied for all terms in the period. However, during the illustrated period, the actual caps that we applied to our fixed-indexed annuities varied from term to term and ranged from 5% to 10%. Caps, spreads, participation rates and terms are subject to change. Indexed interest is credited only on amounts held for the entire term. If the index change during a term is zero or negative, no indexed interest is credited for the term. This example assumes no money is withdrawn from the annuity. Early withdrawal charges will apply if money is withdrawn during the early withdrawal charge period. See the disclosure document for the early withdrawal charge schedule. For qualified contracts, the full amount withdrawn is subject to income tax. For other contracts, only the gains are subject to income tax. If you are under age 59½, the taxable amount is also generally subject to a 10% federal penalty tax. When you buy a fixed-indexed annuity, you own an insurance contract. You are not buying shares of any stock or index. All guarantees are backed by the claims-paying ability of the issuing insurance company.

Withdrawals

| 10% allowance               | During the first contract year, you may withdraw up to 10% of your purchase payments without an early withdrawal charge. After the first contract year, 10% of the account value on the most recent contract anniversary may be withdrawn without an early withdrawal charge. |
| Early withdrawal charges    | During the first 10 contract years, an early withdrawal charge starting at 10% is applied to full surrenders, withdrawals and upon annuitization if the payout period is less than 10 years. Please note that this does not affect the return of premium guarantee feature of this product. (An early withdrawal charge will not be applied to annuitizations made for life.) Each month, this charge decreases by 1/12th of 1%. |

Rates and strategies

| Declared interest rate     | Interest is credited daily on amounts held under a declared rate strategy based on the applicable declared interest rate. The declared interest rate will not change throughout the term. |
| Indexed interest rate      | For the indexed strategies currently available, the indexed interest rate is determined, in part, by the performance of the S&P 500®, and is credited only on the last day of the term. |
| Cap                        | The cap is the maximum indexed interest rate for a term; please contact Great American Life® or your financial professional for the current cap (if any). |
| Annual point-to-point      | An indexed strategy that measures the index change by comparing the closing S&P 500 value at the end of the term to the closing S&P 500 value on the first day of that term. |
| Monthly averaging with cap | An indexed strategy that measures index change by comparing the average of the monthly closing S&P 500 values during the term to the closing S&P 500 value on the first day of that term. |

Riders

| Extended care waiver       | Included for no additional charge, the extended care waiver can help ease the strain of unforeseen events. If, after the first contract year, you are confined to a nursing home or long-term care facility for at least 90 consecutive days, early withdrawal charges will be waived on withdrawals up to a full surrender. |
| Terminal illness waiver    | After the first contract year, if you are diagnosed by a physician as having a terminal illness (prognosis of survival is 12 months or less, or a longer period as required by state law), you have the option to withdraw up to 100% of the account value without incurring an early withdrawal charge. There is no additional charge for this waiver. |
| IncomeSecure               | A guaranteed income rider with a 10% income credit and 7-year income rollup period that provides guaranteed income options for your retirement. There is an annual charge associated with this rider. |
| IncomeSustainer Plus       | A guaranteed income and death benefit rider with an 8% rollup credit for income and death benefits, and a 12-year income rollup period. There is an annual charge associated with this rider. Please note that the income rollup period will end earlier under certain circumstances, such as when you reach your annuity commencement date. See rider brochure for details. |
